MEET THE OWNERS

WALK-IN TUBS

Edward J. Mazza

For the past decade I have consulted with thousands of Seniors about Safe Bathing and Aging- in-Place. During this period, I have managed the sale and installation of 500+ walk-in-tubs and walk-in-showers for brand

names American Standard/Liberation, Safe Step, Kohler, Jacuzzi and SanSpa.

As a former nursing home consultant and hospice spiritual care volunteer, I have seen firsthand the circumstantial events that come with the aging process and the alternative options seniors have to manage the quality of their daily lives. As a former “CFP” Certified Financial Planner and “CSA” Certified Senior Advisor I have had the opportunity to counsel many seniors on financial and aging issues. Working with Seniors has been an extremely rewarding career for me because it allows me to give back which gives me a sense of deep inner satisfaction.

Wayne Martin

The beginning of my working career started 46 years ago as an apprentice carpenter for approximately four years; progressed to a different career as a city police officer, then got promoted to detective.

I decided to get back in the building trades department after a few years and currently am licensed as a homebuilder in Texas, specializing in custom remodeling projects. I later moved into a factory representative position at Jacuzzi and American Standard corporations.

I have a total of over seven years of experience as a representative and installation expert and have completed more than 500 successful installations.
